CITRUS LONGHORNED BEETLE

(*ANOPLOPHORA CHINENSIS*)

A DANGER

to ornamental plants,
to commercial
horticulture nursery
stock, and to the
environment

ATTENTION

**THIS INSECT IS HARMLESS
TO HUMANS BUT EXTREMELY
DANGEROUS TO OUR PLANTS**

The citrus longhorned beetle is a wood-boring insect that is native to Asia. After attacking a tree it reproduces quickly and spreads to nearby plants.

Please report any sightings immediately using one of the following methods:

email: fitosanitario-tarloasiatico@regione.toscana.it

**Telephone: +39-055-438-7735 from Monday
to Friday between 9 am and 1 pm.**

Text messages: +39-366-584-7642
